

ABOUT ME:

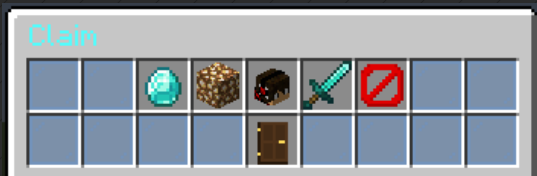

- 17 YEAR OLD STUDENT
- 4 YEARS JAVA EXPERIENCE
- 2+ YEARS SPIGOT API EXPERIENCE
- COMPLETE PROFESSIONALISM

Hi I'm Callum,

I'm an accomplished Spigot Developer, who is successful at programming and configuring minecraft plugins. With traits of a quality-minded and deadlineer -driven developer, I have exceptional abilities in resolving complex problems and building upon exsiting ideas to make them come to life. I am talented with strategic planning, problem-solving and the abilty to work with any project that is givin to me.

PAST PROJECTS

Please note that not all projects are available to purchase as they were made for a private buyer. They are more there as a demonstration as to what I am capable of. However please feel free to contact me about any project shown

Claim Block

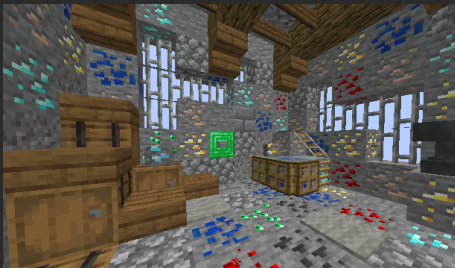

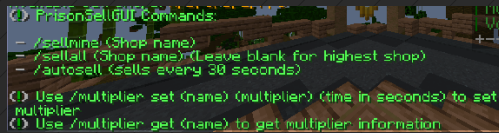

With WorldGuard API

A placeable block which claims the area that is it placed in. Complete with a GUI which shows size, upgrades, settings, members, and deleting the claim. All messages, prices and sizes are customizable through config files.

PrisonSellGUI

With its own custom API

A large custom selling plugin, made for a prison server. The plugin's main features include an unlimited amount of Sell GUIs (customizable in the config), /sellall command, /autosell command, and a multipliers (which have admin commands + are customizable through my API).

Prison Pickaxe

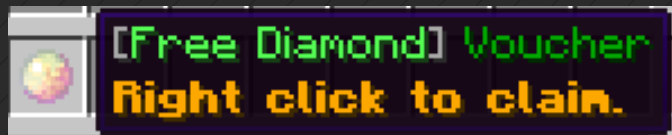

With WorldGuard API

This plugin was made as the main feature to a custom prison server. If you right clicked while holding a pickaxe the enchantment menu would come up. These enchantments included: Fly, explosion, token multi, XP booster (Just to name a few). I integrated the world guard API (for anti-grief). This plugin also contained Tokens (for upgrades) and an AutoMiner

Simple Vouchers

With easy config

This simple voucher plugin is just an update to my first ever plugin I made. Although the idea is old the it is still very useful. With a simple to use config file you can make unlimited vouchers. The vouchers can be given through commands (great for crates), and when right clicked the vouchers can run any command.

You have claimed the voucher!

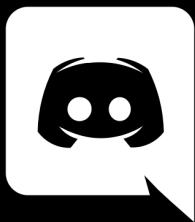

This short list only contains recent large plugins this is by far not all that I have made.

WHAT I CAN OFFER

- Fast Replies
- Custom Spigot Plugins
- Free and Fast Quote
- Competitive Pricing
- Sale of my exsisting plugins
- Configuration work
- Help with anything Spigot/Java

If you are looking for a custom spigot plugin please feel free to DM me on discord to recieve a quote.

For any other queries please DM me on discord.
